Profile

Motivated and results-driven Software Engineer at Oracle, working on the Service Automation Development team within Cloud Operations. With a background in Chemical Engineering, I bring a strong analytical mindset and a passion for solving complex problems through technology. Experienced in Python, JavaScript, Java, SQL, and C++, with a strong interest in applying AI to build intelligent, data driven solutions. Seeking to grow as a full stack developer while deepening expertise in AI and modern technologies.

Experience

SOFTWARE ENGINEER | ORACLE | AUSTIN, TX

JANUARY 2026 – PRESENT

- Build and maintain automated tests for a web application improving reliability and efficiency
- Collaborate with other engineers to develop automation tools across cloud operations
- Earned Oracle AI Foundations Certification, strengthening ability to apply AI/ML concepts within cloud-based solutions

SOFTWARE DEVELOPMENT INTERN | HURLEY PIANO | AUSTIN, TX

AUGUST 2024 – DECEMBER 2024

- Developed a backend for a Godot game designed to teach piano to children with special needs, incorporating features for leaderboards and user account management

SOFTWARE ENGINEER INTERN | ORACLE | AUSTIN, TX

MAY 2024 – AUGUST 2024

- Collaborated with other engineers on the Service Automation Development Team within Cloud Operations to help design, build, and maintain internal tools that streamline workflows and enhance efficiency
- Actively participated in Agile Scrum practices, including daily stand-ups and weekly scrum meetings to ensure timely project delivery and effective team collaboration
- Contributed to the development of a web application, both frontend and backend, using Python, JavaScript, Angular, HTML, and SQL
- Created comprehensive documentation for a PL/SQL package used in a web application detailing functional specifications and usage instructions to facilitate better understanding and maintenance

KEY ACCOUNT MANAGER, SUPPORT ENGINEER, & ROTATIONAL ENGINEER | SOLENIS | CINCINNATI, OH

JULY 2019 – DECEMBER 2022

- Grew and managed a significant customer account with annual sales exceeding \$4,000,000 and cultivated enduring relationships with key stakeholders
- Planned, executed, and assessed over 20 chemical trials by efficiently coordinating cross functional teams
- Proactively identified new business prospects and sustained a robust and active sales funnel
- Provided substantial value to customers by offering technical solutions, leveraging chemical expertise, and demonstrating unwavering commitment to exceptional service
- Spearheaded improvements in safety culture as the district safety coordinator for a team of 20 employees

Education

Bachelor of Science - Software Development | Austin Community College | Austin, TX | Dec 2025

Associate of Science – Computer Programming | Austin Community College | Austin, TX | Dec 2024

Bachelor of Science – Chemical Engineering | Miami University | Oxford, OH | May 2019

Skills

- Python, JavaScript, Java, C++, SQL, HTML, CSS, Angular, Automation Testing, Git, Docker

Certifications

Cypress Automation Testing Framework | Coursera | Mar 2026

Oracle Cloud Infrastructure AI Foundations | Oracle | Feb 2026

Oracle Cloud Infrastructure Foundations Associate | Oracle | Jan 2026

Introduction To Programming with Python | Harvard University | Jun 2023

Introduction to Computer Science | Harvard University | Nov 2022
